

Why Not Tables for Page Layout?

Tables were originally designed for tabular data, not for designing complete webpages.

Table Layout	HTML5 Semantic Layout
Uses table, tr, td	Uses meaningful tags
Difficult to maintain	Easy to maintain
Poor accessibility	Better accessibility
Not responsive	Works better with CSS
Old approach	Modern approach

Basic page structure

Header
Navigation
Main Content
Products
Offers
Services
Footer

Introduction to HTML5 Semantic Tags

1. header

Represents the top section of the webpage.

```
<header>  
  KLECommerce Logo  
</header>
```

2. nav

Contains navigation links.

```
<nav>  
  Home | Products | Contact  
</nav>
```

3. main

Contains the main content of the webpage.

```
<main>  
  Page Content
```

```
</main>
```

4. section

Groups related content.

```
<section>
  Featured Products
</section>
```

5. article

Represents an independent item.

```
<article>
  Product Information
</article>
```

6. footer

Represents the bottom section.

```
<footer>
  Copyright © 2026
</footer>
```

Mapping the Old Webpage

Old Table Section	HTML5 Semantic Tag
Header row	header
Category menu	nav
Banner	section
Featured products	section
Each product	article
Offers	section
Services	section
Footer	footer

Step 1: Basic Structure

```
<!DOCTYPE html>
<html>
<head>
  <title>KLECommerce</title>
</head>
<body>
```

```
</body>
</html>
```

Step 2: Create Header

```
<header>
  

  <input type="text" placeholder="Search Products">

  <input type="submit" value="Search">

  Login | Register | Cart (0)
</header>
```

Step 3: Create Navigation

```
<nav>
  Fashion |
  Groceries |
  Electronics |
  Mobiles |
  Appliances |
  Beauty |
  Books |
  Sports
</nav>
```

Step 4: Create Banner Section

```
<main>

<section>
  
</section>

</main>
```

Step 5: Create Product Section

```
<section>
  <h2>FEATURED PRODUCTS</h2>

  <article>
    
    <h3>Men's Shirt</h3>
    <h2>₹999</h2>
    <input type="button" value="Add to Cart">
  </article>

  <article>
```

```

<h3>Rice Bag</h3>
<h2>₹1200</h2>
<input type="button" value="Add to Cart">
</article>

<article>
  
  <h3>Smart Phone</h3>
  <h2>₹15000</h2>
  <input type="button" value="Add to Cart">
</article>

<article>
  
  <h3>Washing Machine</h3>
  <h2>₹22000</h2>
  <input type="button" value="Add to Cart">
</article>
</section>

```

Step 6: Create Offers Section

```

<section>
  <h2>Today's Special Offers</h2>

  Flat 20% Discount on Fashion Products

  Free Delivery Above ₹999

  Buy One Get One on Selected Products

  Extra Cashback on Electronics
</section>

```

Step 7: Create Customer Services Section

```

<section>
  <h2>Customer Services</h2>

  <article>Easy Returns</article>
  <article>24 × 7 Support</article>
  <article>Secure Payment</article>
  <article>Fast Delivery</article>
</section>

```

Step 8: Create Footer

```

<footer>
  <h2>KLECommerce</h2>

```

Copyright © 2026 KLECommerce
</footer>

Complete HTML5 Code

```
<!DOCTYPE html>
<html>
<head>
  <title>KLECommerce</title>
</head>
<body>

<header>
  

  <input type="text" placeholder="Search Products">

  <input type="submit" value="Search">

  Login | Register | Cart (0)
</header>

<nav>
  Fashion |
  Groceries |
  Electronics |
  Mobiles |
  Appliances |
  Beauty |
  Books |
  Sports
</nav>

<main>

<section>
  
</section>

<section>
```

<h2>FEATURED PRODUCTS</h2>

<article>

<h3>Men's Shirt</h3>

<h2>₹999</h2>

<input type="button" value="Add to Cart">

</article>

<article>

<h3>Rice Bag</h3>

<h2>₹1200</h2>

<input type="button" value="Add to Cart">

</article>

<article>

<h3>Smart Phone</h3>

<h2>₹15000</h2>

<input type="button" value="Add to Cart">

</article>

<article>

<h3>Washing Machine</h3>

<h2>₹22000</h2>

<input type="button" value="Add to Cart">

</article>

</section>

<section>
