

Step 1: Create the HTML Document

Every website starts with an HTML document.

```
<!DOCTYPE html>
<html>

<head>
  <title>KLECommerce</title>
</head>

<body>

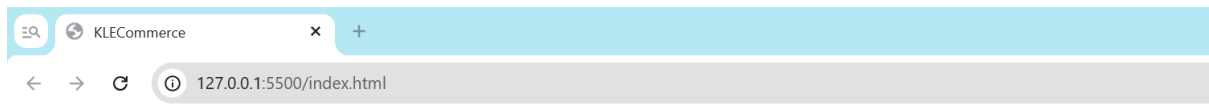

</body>

</html>
```

Description:

- <!DOCTYPE html> → HTML5 document
- <html> → root element
- <head> → metadata
- <title> → browser tab title
- <body> → visible webpage

Result:

Step 2: Add Background Image

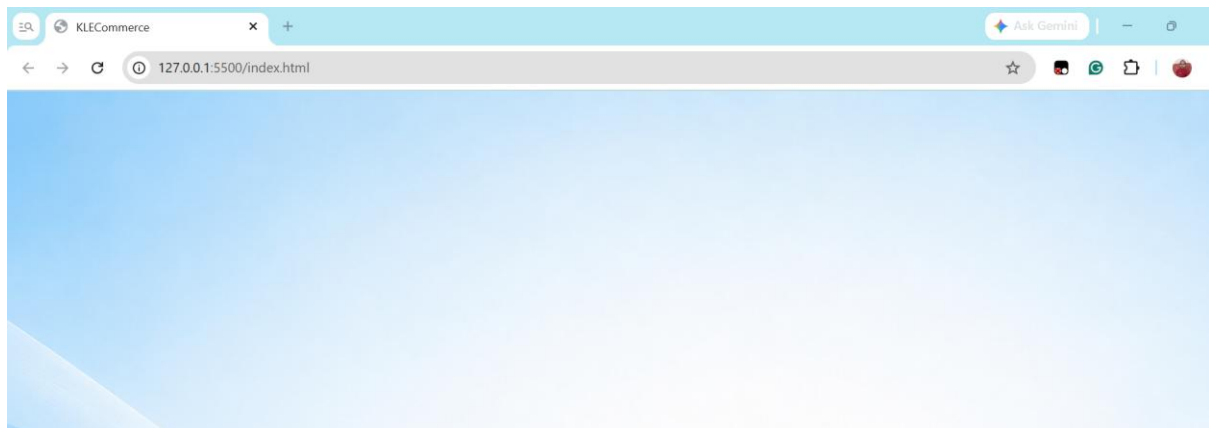

The body attribute.

```
<body background="images/background.png">

</body>
```

Description:

- background displays an image behind the webpage.

Step 3: Create the Main Table

Before CSS, websites were designed using tables.

```
<table border="1" width="100%" cellpadding="10" cellspacing="0">

</table>
```

Description of attribute:

Attribute	Meaning
border="1"	Shows table border
width="100%"	Full browser width

Header
Categories
Banner
Products
Footer

```
<table border="1" width="100%" cellspacing="0" cellpadding="10">
  <tr>
    <td>Header</td>
  </tr>
  <tr>
```

```

        <td>Categories</td>
    </tr>
    <tr>
        <td>Banner</td>
    </tr>
    <tr>
        <td>Products</td>
